Pentest in VS Code, with AI on call.

Docker Kali and Exegol, terminals, kill chain and reports in one workspace. You hack; the AI explains, suggests, and runs only what you approve.

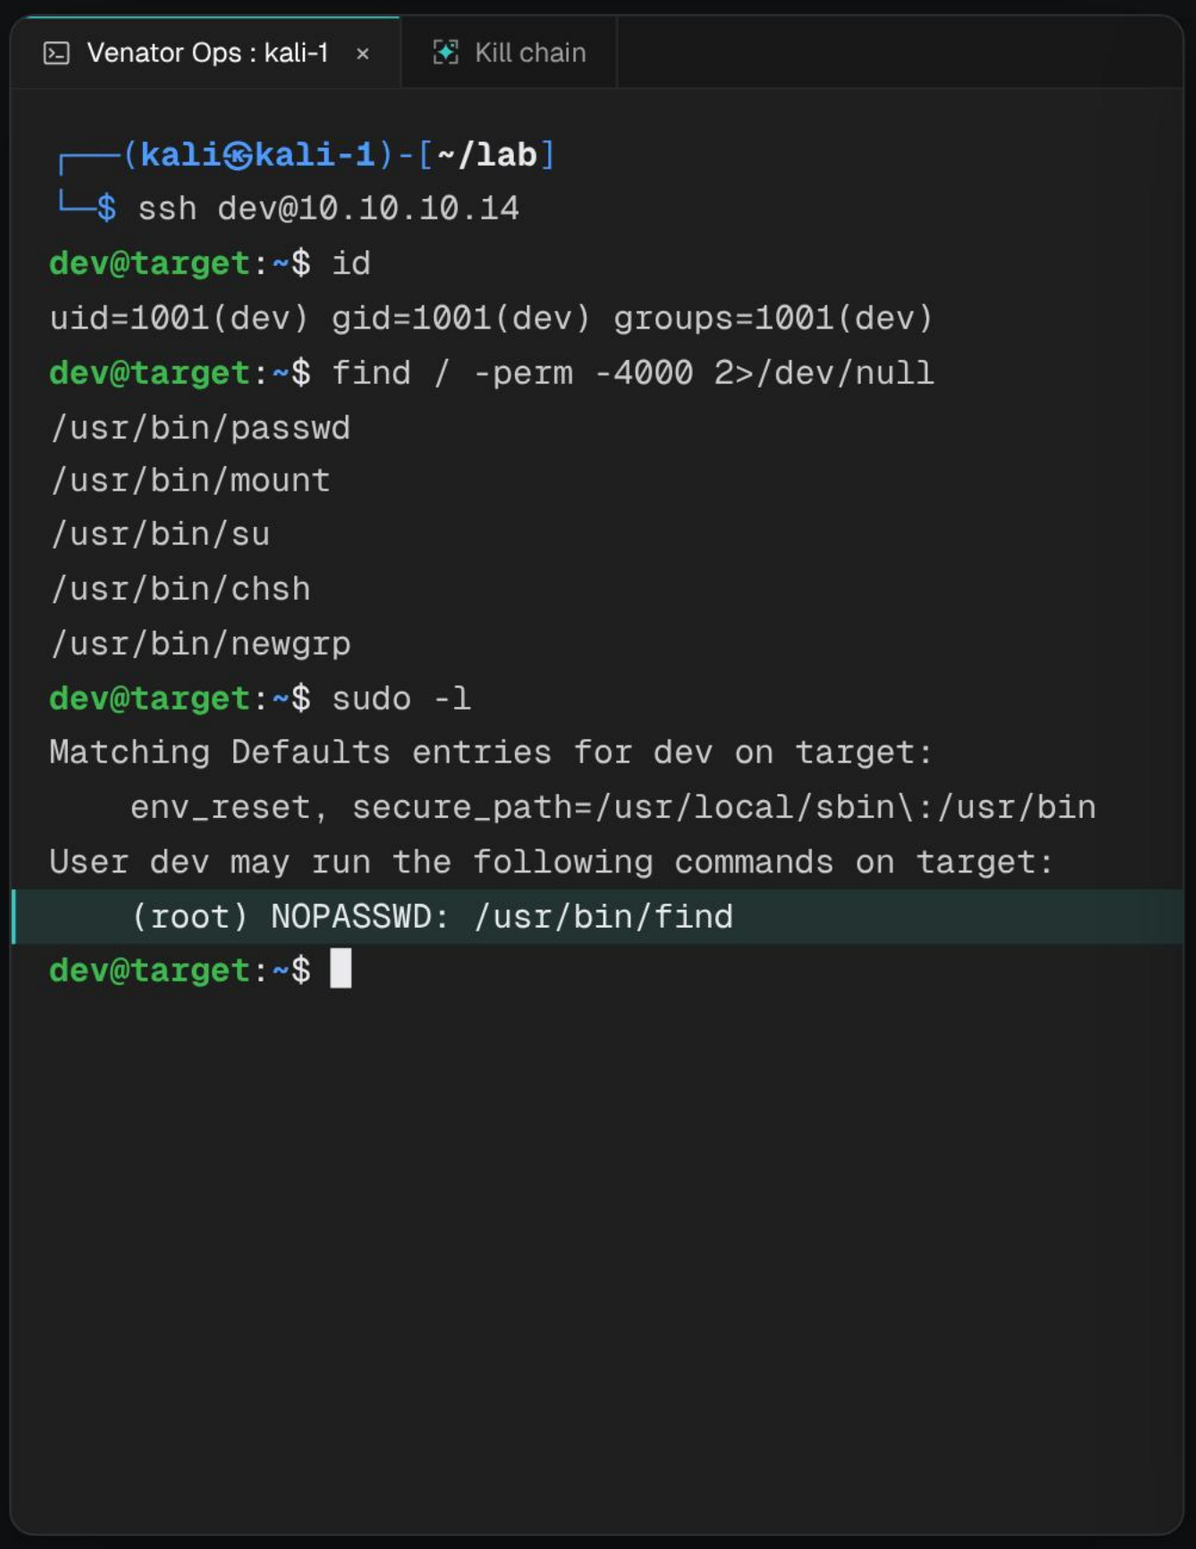

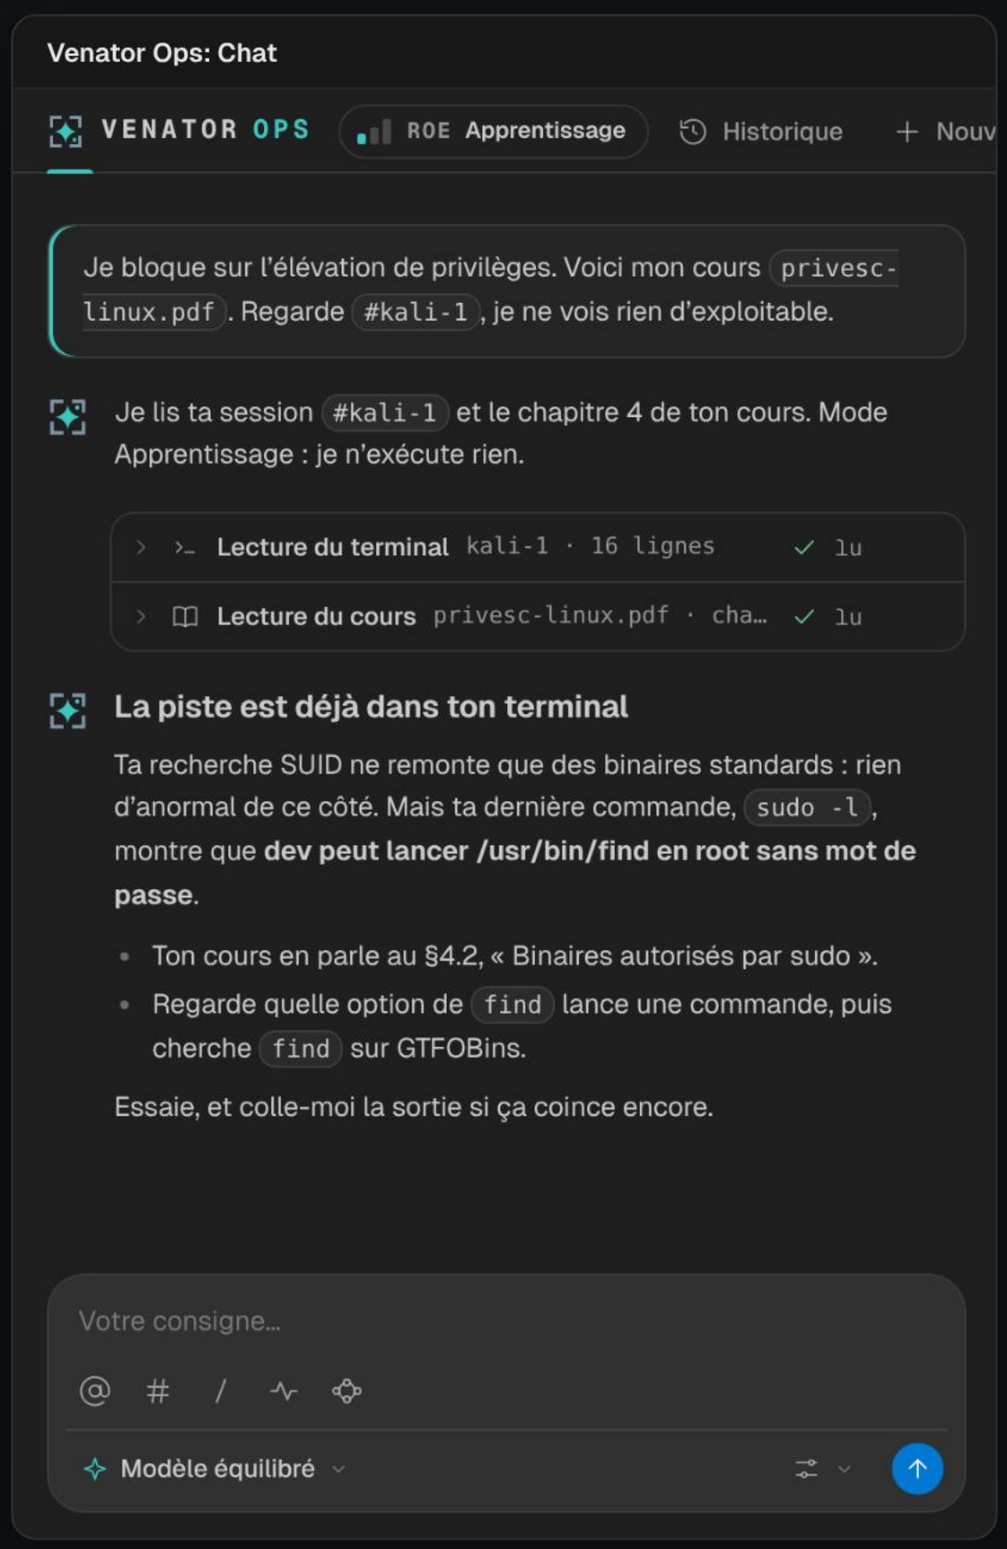

Docker Kali · Exegol · Learning mode · Open source

Stuck on a box?
It read your terminal.

Learning mode: share your course, cite `#kali-1`, and get hints built from what you actually typed.

It reads and explains. It never runs a thing.

Learning mode · Your course · Your terminal · Read-only
